

SCS 3000

Sample Collector System

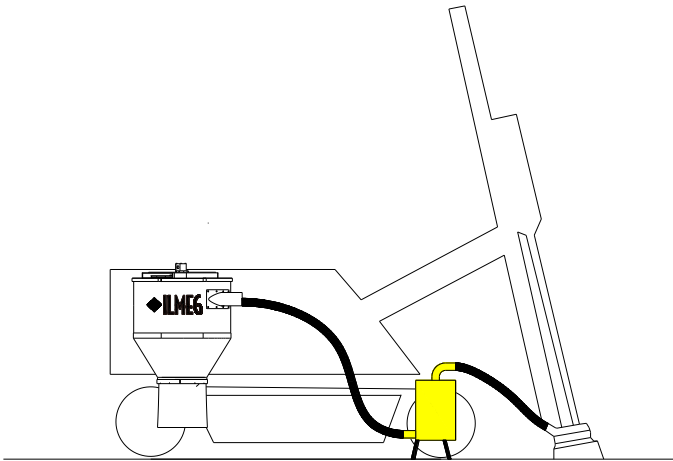

Heavy duty sample collector system for in line use in rock drilling applications

Sample Collector System SCS3000

ILMEG Sample Collector System SCS 3000 is designed to collect samples of drill cuttings & drill dust and is easily installed in-line in the dust collector suction hose of the drilling rig. Cuttings and dust are gathered in exchangeable filter bags.

Specification:

Filter bag volume: 30 dm³
 Hose connections: 3" (75 mm)
 Approx. weight empty: 25 kg
 Main dimensions: 400x 400x1000mm (WxLxH)

In-line use of the SCS 3000.
 Used together with a standard dust collector.
