➤ Improved Performance

Lower pressure drop over the pre separator results in better overall suction performance.

➤ Quicker Service, Better Reliability

Are you working in abrasive rock? The wear parts are easily replaced as preventative maintenance.

➤ Latitude suction hose mounting advantage.

Normal pre separators have a 90° angle between the inlet and outlet, latitude – longitude mounting. The new ILMEG PS Latitude Series has parallel inlets and outlets. This makes the hose routing easier and more functional on many drilling rigs.

➤ Compact and Robust

The ILMEG PS Latitude series is compact and robust
